Energy Modeling Assistance Program

The Heritage Gas **Energy Modelling Assistance Program** assists developers of eligible new multi-unit residential building projects to design and evaluate natural gas space heating and/or domestic hot water system options.

The incentive covers up to $5,000 of the incremental cost to include a natural gas space heating and/or domestic hot water system in the building energy model.

For criteria and eligibility, please visit our **website**

Section 1 – Customer Information Fields

Customer Name:	**City/Town:**
Email Address:	**Postal Code:**
Location of Project:	**Telephone:**
Mailing Address:	

Section 2 – Energy Modeling Assistance Required

Energy Modeler Used: _____.

Energy Modelling Assistance Program		
☐	**Energy Modelling Assistance for Heating System** *Modelling for natural gas based primary heating system.*	**$3,000**
☐	**Energy Modelling Assistance for Domestic Hot Water System** *Modelling for natural gas based domestic hot water system.*	**$2,000**

* Please select what energy modeling work you are looking for assistance with

Additional Comments:

_____.

Section 3 – Customer Statement

☐ I confirm that the energy modelling work above adheres to the project approval criteria outlined within the energy modelling assistance program.

Section 4 – Signatures

Signature of Application: _____ Date: _____

Signature of Issuer: _____ Date: _____

Section 5 – Heritage Gas Use Only

Customer Premise ID: _____
